Eye/face protection:

Tightly sealed safety glasses.

Skin protection:

Protect skin by using skin protective cream.

Hand protection: The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. The specifications are based on own tests, literature data and information of glove manufacturers or are derived from similar substances by analogy. Due to many conditions (e.g. temperature) it must be considered, that the practical usage of a chemical-protective glove in practice may be shorter than the permeation time determined in accordance with EN 374. Manufacturer's directions for use should be observed because of great diversity of types.

Suitable material: NBR (Nitrile rubber)

Thickness of the glove material: 0,11 mm

Breakthrough time (maximum wearing time): > 480 min

Respiratory protection:

Respiratory protection necessary at: insufficient ventilation, exceeding exposure limit values

Suitable respiratory protection apparatus: Filtering device (DIN EN 147) P 2

Other protection measures:

Protective clothing: Wear suitable protective clothing.

General health and safety measures: When using do not eat, drink, smoke, sniff. Wash hands before breaks and after work. Keep away from food, drink and animal feedingstuffs.
